IQ: Insights and Questions

Monsters are amazing!

Me encato la idea de como colaborar virtualmente

I: the layers that give meaning and learning opportunities in every project

Insights: My students would love to make animalias with this program!

Kids can totally do this and write amazing stories to accompany them that can be huge life lessons!

Collaboration is possible remotely via breakout rooms

Insights: I just love all the simple ways to keep kids engaged on a computer. Stretching, games, annotating.

Q: What are more ways to collaborate.. this is so exciting

The memory game template is a nice resource.

IQ: Insights and Questions

Insights: Loved how creative and silly we had to be.
Question: What social emotional books can I connect to this?

Questions: What other children's picture books would be good for teaching about myths and monsters?

Questions: Could the Google Drawing files be put on a whiteboard so it is easier for younger kids to use?

Lots of ideas of interactive activities for the fall & how to manage large zoom classes

Es posible crear tutoriales de como insertar imagnes para los estudiantes de kinder

students will love this project with the monsters

Our students would love this!!! I can't wait to integrate it!

creative collaboration rocks!

Looking forward to using this with my students!

IQ: Insights and Questions

I love having the breakout rooms. We were able to talk about some ways that we can adjust activities for lower grade levels and sped..

There are so many possibilities with google drawings. Thank you for sharing and carefully teaching us how to use all its features.

Insights: The power of collaboration is amazing. Especially when all partners come with ideas to contribute.

the freedom that each activity allowed was amazing!

Insight: We need to begin remote learning with teaching kids and parents and teachers how to use these great tools!

i really like the idea of using google drawing for collaborative work. the memory game was so much fine

Fun and interactive.....learned a lot by "playing" around. I think students will love this kind of thing

I love that I can use all these ideas and resources with my students.

I love how writing was incorporated with the arts. Often times writing is very difficult for children, but this leaves room for their creativity!

IQ: Insights and Questions

INSIGHT: A great way to get students collaborating together on something FUN

How can I adapt the curriculum to utilize shared stories such as myths and legends, to drive an entire school year of learning!?

I didn't realize how important breaks are when sitting on a screen after a few hours.

How can I adapt these ideas for a science curriculum?

Engaging and stimulating...

Insight- I loved the convo of hair and sisterhood through the granabu. I have always had long hair but I can't braid however my fondest memories are of my sisters and mother braiding my hair.

So enjoyable today while learning on line.

This experience was engaging on so many levels. Creative, collaborative, reflective...on and on!

I LOVE the way this activity forced us to really think about animal traits, and how those traits can be amplified for good!

IQ: Insights and Questions

Breakout rooms = life

So many possibilities with this monster tool! Linking it with rich text.

íguau! Como quisiera que mi creatura existiera en estos y otros tiempos. Can't wait to use these ideas!

Loved creating the mythological creatures with a partner. So great to share and learn how to partner. Loved how you broke done each step and made it doable. Love the modeling of each part. Need to remember how to do more modeling.

Great to learn more about culture for other people.

I love all these cool ideas you guys are presenting to us. I feel I can come back to school offering them more options to work and help them learn online.

Thank you for helping me become more comfortable with google drawing and zoom

i think that we will be google drawing pros by Friday

We do folktales in 4th grade, this would fit in, with making pictures for the stories.

IQ: Insights and Questions

This activity reminds me of Eric Carle's The Mixed Up Chameleon , Students can choose animals to represent their different character traits

More books for grades pre-k-2 that can connect to this! please and thank you!

Question: Can Habla please help us incorporate CCSS into a unit like this?

This lesson could be implemented across subject areas.

Working together is still powerful.

Insights: While the project was fantastical, the needs and powers that these new myths have for 2020 are deeply moving and powerful.

Insight: That I should be sharing more illustrations and stories that involve more myths in my classroom. Their are some beautiful tales out there and it allow the students to take interest in other cultures' folklore.

It feels so good to be creative!!

Seria genial combinar estas herramientas junto con la maestra laboratorio de computadoras para que cada una trabaje en cierta habiliad y no sea repetitivo

IQ: Insights and Questions

My question is how do you create the templates you use for each of the activities. Would love to learn how you manage all the preparation. Your team is seamless.

when I was in college, i was able to cheat my bio lab and do it on a CD rom. I wonder if you can dissect a frog on google drawings!

Breakout rooms would be beneficial for differentiation

Breaks are so important. I needed to stretch and standup.

To help with our elearning can you share some of the time templates that you have found that are appropriate? How long can you Eteach Before you need a break?

Multiple subjects can be taught around these activities.

Kids will love learning about Mexican folklore!

How were you able to create the memory game? I would love to learn how to create games!

I still love the way you are breaking down how to easily explain to a young person or non-tech savvy adult easily

IQ: Insights and Questions

Me encanta aplicar colaboration y pensamiento critico al mismo tiempo

Summit: When can teachers start planning their remote units?!

Loved working in the different break rooms listening to each others stories.

Insights: This really makes me think about project based learning. You can incorporate so many areas of the curriculum and students will have fun!

We may have to look into seeing if Chromebooks can use the annotate function because I was having a hard time with my chromebook and our students use Chromebooks

Great step by step modeling. I enjoyed being able to be creative and collaborate with a partner to share ideas. I loved being able to create a mythical creature!
